The First Basically Improved Hack Saw in Tool-Making History

The World's Only

Double Hac-Saw

The "Double Hac-Saw" is designed to eliminate the recognized weaknesses of conventional hack saws. Revolutionary frame mounts Two 12" Blades—Fine Tooth for light work, Coarse Tooth for heavier work. Both blades cut Full 5" Diameter. Both are held at much Greater Tension than any old-style frame can stand. That's why *The Double Hac-Saw eliminates blade wobble and bending strain*, Reduces Blade Breakage. Blades stay sharp longer, cut faster, straighter, cleaner. The Double Hac-Saw also eliminates nuisance of blade-changing when work shifts from one material to another. Now, for the first time, you have an instant choice of coarse or fine tooth blades *in the same frame*. "Just use the blade that fits the job." And if a replacement is needed, extra blades are handy in the tubular shaft. The new Double Hac-Saw is so much better so many ways it can't miss with the "pros" or the expanding "Do-It-Yourself" market. Stock now through your jobber, be among the first to profit.

*The Double Hac-Saw is another product of
